

Complete Proficiency Approach (CPA)

Raising the Bar for Safety in General Aviation: Introducing IA's *Complete Proficiency Approach™* Training Program

For decades, U.S. airlines have maintained the finest safety record in the world thanks in part to a single practice: Continuous pilot proficiency training. Unfortunately, General Aviation has never come close to commercial airlines' stellar performance.

At Independence Aviation (IA), we believe the time has come to make a change for the better.

Safety: The Most Important Factor in Aviation

Whether flying a commercial airliner with 250 passengers on board or flying solo in a Cirrus SR20 – or anything in between – safety should be every pilot's top priority.

As a business executive and pilot, you understand that while flying is a source of unbridled joy, it's also serious business – which is why IA has designed its *Complete Proficiency Approach™* to keep aviation operators, their flight teams and customers *continuously* engaged in sharpening their skills to achieve the kind of safety superiority that U.S. commercial airlines have proved possible on a remarkable scale.

***Complete Proficiency Approach™* Training: What It Is**

Due to strong customer demand and our own commitment to aviation safety, IA management has melded our combined flight experience with the best elements of Cirrus' six-month training tasks, the standards and principles of the Cirrus Owners and Pilots Association and the best of the FAA Safety WINGS program to create a personalized program that rivals the content of commercial airlines proficiency training but *tailored to meet your General Aviation needs.*

Truly a first in General Aviation, *CPA* is Top Gun-style training designed for *accomplished pilots* to spur them to achieve exceptional *proficiency and confidence* in the airplane. And it's all accomplished while having fun training with fellow aviators, and one-on-one with your instructor.

The program delivers results that busy executives and leaders simply can't achieve on the fly trying to digest FAA advisory circulars, BFR, IPC and other training requirements. *CPA* participants and their flying partners achieve a sense of confidence and skills that delivers a tangible new comfort for pilots, friends and family in the aircraft.

CPA Training: What You Get/Benefits

CPA participants comprise an elite group of aviators committed to the highest standards of safety for themselves and their passengers. This excellence is achieved through a rigorous, but fun, packaged 12-month regimen including:

- regular flight training with an Independence Aviation instructor to accomplish the tasks and functions that will keep you always current
- training that qualifies participants for flight review and Instrument Proficiency Check endorsements
- day-long workshop covering topics such as
 - aircraft maintenance
 - aerodynamics
 - diversion decisions
 - loss of control prevention
 - avionics best practices
 - instrument chart clinics
 - weather, crosswinds
 - ATC interaction
 - iPads in the cockpit
 - Non-pilot partner training
 - Cirrus training portal
 - and more
- selected online training from various professional providers
- Discount for attending a Cirrus Pilot Proficiency Program
- Potential insurance premium savings
- Unlimited simulator use
- IA instructor/mentor pilot support and advice

Upcoming Complete Proficiency Approach™ Events

Independence Aviation is proud to be designated as a Cirrus Platinum Training Center by Cirrus Aircraft.

A select few aviation companies worldwide hold this prestigious designation that epitomizes "premium quality service, exceptional training, outstanding support and state-of-the-art technical skill."
